OBJECTS AT HEIGHTS HANDBOOK

A KLEIN TOOLS COMPANY

A GUIDE TO SOLUTIONS FOR A DROPS FREE ZONE™

THE SAFEST WAY TO GET HIGH

FOLLOW THE LEADER IN DROPPED OBJECTS PREVENTION

More and more workers are finding themselves ascending to heights in all industries, and along with them, the tools and equipment necessary to do the job.

Join us in setting a higher standard in at-heights safety with innovative solutions, immersive education and a proactive game plan to stop drops and the damage done.

THE RISK

**LUCK IS BAD POLICY.
DROPS WILL HAPPEN.**

A NEAR-NUCLEAR LESSON ON THE
IMPORTANCE OF KEEPING THINGS
TETHERED AND TIED.

ONE DROP. UNTHINKABLE CATASTROPHE.

The most serious nuclear threat in the history of the U.S. came not from the Soviets, but from a single nine-pound wrench socket.

Dropped by an airman performing maintenance on a Titan II missile at a launch complex in Damascus, Arkansas, the socket fell 70 feet, ripping a hole in a fuel tank, leading to an explosion that forced a 9-megaton warhead out of the ground.

Thankfully, safety features prevented any loss of radioactive spillage or detonation—but the explosion killed one and injured about twenty more. The 1980 Damascus Titan missile explosion is a drastic example of what can result from operating like everything is going to work perfectly every time. In this case, it almost wiped an entire state off the map.

THE RISING COST OF FALLING OBJECTS

Severe injury and fatality from dropped objects—even something as small as a wrench socket—are all too common, resulting in thousands of injuries, hundreds of deaths, hundreds of millions in total costs and who knows how many close calls every year.

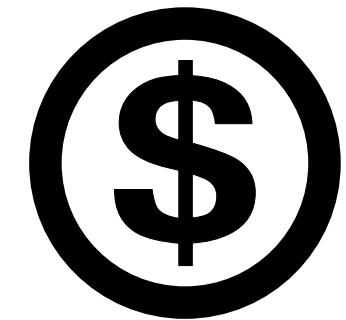

45,000+ INJURIES

Falling objects or equipment resulted in 5%+ of all workplace injuries.

OVER 200 FATALITIES

Represents approximately half of all “struck by” incidents and 5% of all workplace fatalities.

OVER \$300,000,000

Fatalities x \$1.4M = the average cost per fatal accident.

*ANNUAL AVERAGES PER BLS & NSC DATA

PREVENTION

**GET DROPS PREVENTION
DOWN TO A “T”**
A COMPLETE TETHERING
SYSTEM 101

THE 3Ts OF DROPS PREVENTION

We all know the ABCs of human fall protection. But what about the “3Ts” of fall protection for tools and equipment?

1 TRAPPED

2 TETHERED

3 TOPPED

1 2 3

TRAPPED

CREATING CONNECTION POINTS ON TOOLS AND EQUIPMENT

Trapping refers to retrofitting a connection point onto a tool or primary anchor for a safer attachment point. Most tools do not come with a secure attachment point built into the tool. In these situations, a secure attachment point must be created.

1 2 3

TETHERED

RETENTION BETWEEN TOOLS/GEAR AND ANCHOR POINTS

Tethering is the retention of tools and equipment to the anchor points that hold them. This is often achieved through use of a tool lanyard. These lanyards should have the proper connection on each end for the tools and anchors being used. They should also be made with a shock-absorbing design whenever possible.

1 2 3

TOPPED

SECURE CLOSURE ON CONTAINERS FOR TOOLS AND EQUIPMENT

Tool pouches, bags and hoist buckets/bags should have a secure closure or “top” that can cover contents and prevent them from spilling if tipped. All containers may have tethering points available to attach tool lanyards but, if a container does not have a secure closure, it must have these tethering points available.

THE STANDARD

ANSI/ISEA 121
A HIGHER STANDARD IN
AT-HEIGHTS SAFETY

ANSI/ISEA

121

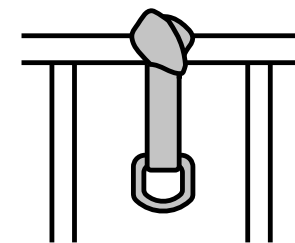

Recognizing the pressing need for formal guidelines within the category of Objects at Heights, leading safety equipment manufacturers like Ergodyne joined forces with the International Safety Equipment Association (ISEA) to develop a standard for tethering and transporting tools and equipment. ANSI/ISEA 121-2018 is the first standard for this type of equipment.

WHAT ANSI 121 COVERS

Similar to ANSI Z359 for fall protection, ANSI/ISEA 121-2018 is recognized as industry best practice. Though not directly enforceable by OSHA, the standard can be referred to under the General Duty Clause to interpret a better way for protecting workers against falling objects. The current standard focuses on four classes of preventative solutions actively used by workers to mitigate dropped objects: tool attachments, anchor attachments, tool tethers and containers.

The measure does not address things like passive preventative solutions (netting, toe boards, etc.) or best practices in the field—like telling workers where they should connect a tool lanyard on their harnesses.

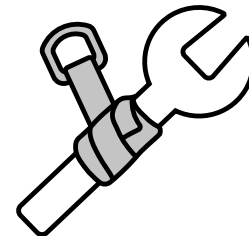

ANCHOR ATTACHMENTS

Retrofit attachment points installed onto tools and equipment, allowing them to be tethered.

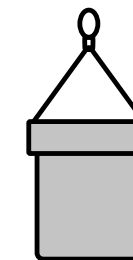

TOOL TETHERS

Lanyards that connect tools to an anchor point.

TOOL ATTACHMENTS

Retrofit attachment points installed onto tools and equipment, allowing them to be tethered.

CONTAINERS

Bags and buckets used to transport tools and equipment to and from at-heights work zones.

DESIGN & TESTING

Preventing wayward wrenches from wreaking worksite havoc is one thing. Doing it without creating time-sucking tangles or even new hazards is quite another. Squids Lanyards offer obsessively designed solutions for any environment—from wide open spaces to cramped quarters.

TRAPPED: SQUIDS TOOL + ANCHOR ATTACHMENTS **A hold-on-tight tethering point for every tool.**

From power tools to water bottles, you've got the hookup with Squids Tool + Anchor Attachments—helping create an ANSI-approved tethering point on...just about anything.

TETHERED: SQUIDS EQUIPMENT + TOOL LANYARDS **Don't let your drops prevention solution become part of the problem.**

With mindful considerations for every workspace, Squids Lanyards make sure you don't get twisted up in a game of safety whack-a-mole trying to squash the drops.

TOPPED: ARSENAL GEAR + TOOL STORAGE **Hoist it. Holster it. Haul it.**

Spend less time thinking about the best way to safely bring what you need above ground level and more time thinking about your regularly scheduled conundrum with Arsenal Gear + Tool Storage.

TESTED TO BE TRUSTED

Every component of our Tethering Systems is stringently tested at a certified, third-party testing lab.

SCAN TO SEE SQUIDS PUT TO THE TEST >>>

POWER TOOLS

Retrofit tethering points for power tools can get clunky. Squids Tool + Anchor Attachments stay out of the way of tool operation and a job well done.

HAND TOOLS

From spud wrench to the smallest wee little hex wrench, you'll find a Squids solution to tie off hand tools of any size, shape or weight.

INSTRUMENTS + DEVICES

Avoid dropped calls, flying Dasani and tumbling tape measures. If it's going up, we've got solutions to lock it down.

SHOCK ABSORBING

Don't let your lanyard drag you down. Shock-absorbing designs help reduce the dynamic force on the body if a drop occurs.

RETRACTABLE

Eliminate the octopus effect with retractable designs that limit snag hazards and keep a low profile when anchored.

RESILIENT MATERIALS

Designed and constructed to withstand heavy, repeated use and the rugged realities of your worksite.

SECURE CLOSURES

Keep tools, gear and hardware secure when your world gets turned upside down.

TETHER POINTS

Add more ANSI-rated attachment points to your tool rig while also housing small parts and hardware.

HEAVY-DUTY CONSTRUCTION

Hard work is hard on gear. Arsenal Gear + Tool Storage is built and tested to hold up to extreme environments and use.

SQUIDS® LANYARDS:

RETRACTABLE & WRIST

Work. Retract. Repeat. Squids Retractable & Wrist Lanyards are a tour de force of tool-touting safety and convenience, with durable patented designs and self-setting length features that make the ol’ black thumb a distant memory.

3002 / 3003

LOCKING CARABINER AND BELT LOOP / DUAL LOCKING CARABINER

- Retractable design limits snag hazards and keeps a low profile when anchored
- Workers can easily pull the cord out of the housing and let it retract back in
- Nylon housing with fiberglass reinforcement protects internal components and holds up in the toughest environments

ORDER MULTIPLE: 1		
ITEM #	SIZE	COLOR
3002 - 19302	6-48in // 15-122cm	Gray
3003 - 19303	8-48in // 20-122cm	Gray

3000 / 3001

DUAL STAINLESS-STEEL CARABINERS / CARABINER & LOOP

- Retractable design limits snags, tangles and tripping hazards
- Plated swiveling ring for 360-degree rotation works well with rotating tools to reduce tangles
- Modular connecting buckle to quickly exchange tools when used together with the Squids 3025 Stainless Steel Carabiner Accessory 3-Pack

ORDER MULTIPLE: 1		
ITEM #	SIZE	COLOR

RETRACTABLES AND YOU

A STUDY IN SIZES AND USES

From small hand tools like screwdrivers, jab saws and speed squares to mid-size claw spud wrenches and hefty cordless drivers, our retractable lanyards keep you locked and loaded for tangle-free tethering. With ANSI/ISEA 2018 ratings up to eight pounds, plus single, dual and modular buckle woptions, your tools will be securely tethered—and out of the way until you need them.

SQUIDS® LANYARDS:

TOOL & EQUIPMENT

Tethers can stop a tool from crashing to the ground, but they can't stop gravity. Squids Shock-Absorbing Lanyards prevent free-falling wrenches AND absorb the shock load of the catch to save workers and tools from damage-inducing whiplash.

3104F(x)

CARABINER AND CINCH LOOP

- Shocking absorbing 1680D polyester-elastic webbing reduces the dynamic force on the body or other anchor point if drop occurs
- Low-profile cinch loop end allows for easy tethering to small captive holes on tools
- Locking screw-gate aluminum carabiner
- Captive eye design better predicts direction of load on carabiner and prevents lanyard from sliding into carabiner gate

ORDER MULTIPLE: 1

ITEM #	SIZE	COLOR
19804	38-48in // 96-122cm	Orange/Black

3102F(x)

DETACHABLE CARABINER AND CINCH LOOP

- Shock absorbing properties reduce the dynamic force on the body or other anchor point if drop occurs
- Low profile lightweight design reduces snag hazards and added weight
- Modular connecting buckle for exchanging tools

ORDER MULTIPLE: 1

ITEM #	SIZE	COLOR
19864	38-48in // 96-122cm	Orange/Black

3108F(x) / 3118F(x)

CARABINER + LOOP / DUAL CARABINERS

- Shock absorbing properties reduce the dynamic force on the body or other anchor point if drop occurs
- Low profile lightweight design reduces snag hazards and added weight
- Ergonomic carabiner is designed for easily gripping and handling with gloves

ORDER MULTIPLE: 1

ITEM #	SIZE	COLOR
3108Fx - 19808	38-48in // 96-122cm	Orange/Black
3118Fx - 19828	38-48in // 96-122cm	Orange/Black

3109F(x) / 3119F(x)

DOUBLE-LOCKING SWIVEL CARABINER + LOOP / DUAL CARABINERS

- Shock absorbing properties reduce the dynamic force on the body or other anchor point if drop occurs
- Low profile lightweight design reduces snag hazards and added weight
- Single length construction eliminates weak points seen with multi-component lanyards

ORDER MULTIPLE: 1

ITEM #	SIZE	COLOR
